

BE READY FOR THE WINTER

High Purity White De-icing Salt

- A high purity white de-icing salt typically 99.1 - 99.5% NaCl (min. 98.5%) providing a quicker de-icing effect
- Specially graded to BS 3247, (ideal for paths, roads, car parks and highways)
- Clean and anti-caking which leaves no residue on the ground, ideal for all access areas

NGS's white, finest quality de-icing salt is of the highest purity enabling you to use your salt more efficiently. The purity provides a quicker de-icing effect.

Ordinary brown salt contains impurities that create a muddy sludge that is tramped into cars and buildings, costing time and money to clear up as well as having a slower effect.
